Cybercrime is criminal activity that either targets or uses a computer, a computer network or a networked device. Most cybercrime is committed by cybercriminals or hackers who want to make money. However, occasionally cybercrime aims to damage computers or networks for reasons other than profit.

From last few years, it has been observed that there has been 53.5% rise in the Cyber Crime. According to a report many cyber criminals were arrested, who were mostly the young adults. Out of 324 people arrested under the IT Act, 215 were from the age group of 18–30 years.
