- Appreciation

Background:

Work-life balance is the idea that a fulfilling life outside of work helps improve work performance while reducing stress. The time a person spends working should be balanced by time spent with friends and family, keeping fit, traveling, and doing other fulfilling hobbies.

What Is Work-Life Balance?

Work-life balance simply means striking a healthy balance between your working life and your personal life. Work-life balance isn't necessarily defined as an even split between the hours you spend at work and the hours you spend on hobbies. The balance is more nuanced than that, and it also varies among different people.

Instead, you might think of work-life balance as a balance between achieving and enjoyment. The perfect work-life balance would mean never sacrificing one for the other. It involves continually push your achievements in a professional sense while also finding new and fulfilling ways to enjoy your time off.

How Does Work-Life Balance Work?

At its core, the work-life balance concept exists solely to bring attention to the fact that being a workaholic is detrimental to a person's physical and mental well-being. Socializing, physical activity, and hobbies all contribute to being healthier and happier.

Not everyone's job involves intense physical labor in a depressing environment, but work-life balance isn't just important for those with difficult jobs. Everyone is at risk of letting work take up an unhealthy portion of their life. For those who already enjoy their jobs, awareness of work-life balance can help ensure that they continue to enjoy their jobs, reduce stress, and prevent burnout.

Background:

The COVID-19 pandemic has led the world to undertake the largest vaccination campaign in human history. In record time, unprecedented scientific and governmental efforts have resulted in the acquisition of immunizers utilizing different technologies (nucleotide acids, viral vectors, inactivated and protein-based vaccines). Currently, 33 vaccines have already been approved by regulatory agencies in different countries, and more than 10 billion doses have been administered worldwide. Despite the undeniable impact of vaccination on the control of the pandemic, the recurrent emergence of new variants of interest has raised new challenges. The recent viral mutations precede new outbreaks that rapidly spread at global proportions. In addition, reducing protective efficacy rates have been observed among the main authorized vaccines. Besides these issues, several other crucial issues for the appropriate combatting of the pandemic remain uncertain or under investigation. Particularly noteworthy issues include the use of vaccine-boosting strategies to increase protection; concerns related to the long-term safety of vaccines, child immunization reliability and uncommon adverse events; the persistence of the virus in society; and the transition from a pandemic to an endemic state. In this review, we describe the updated scenario regarding SARS-CoV-2 variants and COVID-19 vaccines. In addition, we outline current discussions covering COVID-19 vaccine safety and efficacy, and the future pandemic perspectives.

Analysis of several studies shows that the efficiency or effectiveness of vaccines against SARS-CoV-2 variants depends on many factors, including the sample size, demographic factors, host factors, the type of vaccine, the number of doses, a heterologous or homologous booster vaccination scheme, and the time after primary vaccination is completed

Radhakrishna Institute of Technology
and Engineering, Bhubaneswar

Background:

The world celebrated International Women's Day last month and it was heartening to see organisations, both large and small, take steps to understand and embrace equity. That being said, employers often use the month to celebrate their female workforce but leave much to be desired in the steps that they take for accelerating gender parity at the workplace. The World Economic Forum, in its Global Gender Gap Report, 2022, ranked India at 135 out of 146 countries in terms of gender gap, and noted that gender parity is not recovering and that it would take another 132 years to close the global gender gap.

While gender inequality can be attributed to several systemic socio-economic and political causes, organisations and employers have great potential in driving change and bridging the gap. A first step would be for employers to understand and comply with the laws applicable to women at the workplace. In this article, we aim to provide a quick overview of employment related rights available to women employed by private sector organisations in India.

Constitutionally guaranteed rights: The Constitution of India, considered the supreme law of the land, it guarantees every person equality before the law and prohibits discrimination against any citizen based on sex. The Constitution also guarantees to citizens of India, the right to practise any profession, or to carry on any occupation, trade or business.

Right to equal remuneration and opportunities: The Equal Remuneration Act, 1976, provides for equal remuneration of men and women workers for work of the same and similar nature. The statute also prohibits discrimination of women workers in recruitment, promotions, training and other employment conditions. Employers are required to maintain records and registers related to compliance and make them available for inspection by relevant authorities.

Right to harassment free work environment: The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 was introduced to provide a safe working environment for women at the workplace, whether or not employees. In addition to taking steps to prevent workplace sexual harassment, an employer is required to set up an internal committee to receive and redress sexual harassment complaints in a time bound and confidential manner. Employers are also mandated to carry out regular training for the employees on the subject.

Maternity benefit and protection of employment: The Maternity Benefit Act, 1961 entitles eligible women employees to up to twenty-six weeks of paid maternity leave, which makes it one of the most generous maternity benefit laws in the world. This legislation also allows twelve weeks of paid maternity leave to surrogate mothers and to women who adopt a child below three months of age. Additionally, women employees are eligible to paid leave in case of illness arising out of pregnancy or delivery, premature birth, miscarriage, and medical termination of pregnancy. Further, the statute includes protections for women on maternity leave from termination of employment and prejudicial changes to their conditions of employment. Employers are also required to provide benefits enabling women to return to work after the maternity break, such as, providing creche facilities, and nursing breaks. Employers may also allow the women employees to work from home post the period of maternity benefit if the nature of work is such that she may work from home. The Employees' State Insurance Act, 1948, also provides benefits to insured

women employees, including medical care, sickness benefits, maternity benefits and disablement benefits.

Health and safety: The Factories Act, 1948, mandates employers to take necessary health, safety and welfare measures for women employees. These include providing separate washrooms, changing rooms and lockers for women employees, and following special security and other protocols to engage female employees during night-time hours. State-specific shops and commercial establishments also stipulate similar obligations on employers. For example, the Government of Haryana has laid down detailed guidelines for the employment of women in night shifts in certain classes of establishments, including provision of transportation and medical facilities.

Mandatory board representation: The Companies Act, 2013, requires certain classes of companies to have at least one woman director on its board. This is to ensure that women are represented at the highest levels of decision-making in a company.

In conclusion, it is the responsibility of every employer to ensure that women are given their due rights in the workplace. By being aware of and adhering to the requirements of various labour and employment legislations, employers can foster a positive workplace that values gender equality and diversity. This, in turn, can contribute to higher employee satisfaction, retention, and productivity. Employers must also look beyond the requirements of the legislation and adopt measures to accelerate equity in the workplace.

Dear Principal,

Radhakrishna Institute of Technology and Engineering

IDCO Plot No-1, Khordha Industrial Estate, Bhubaneswar

I am writing to express my sincerest appreciation to you and your team for inviting me to speak about **"Workplace Law for Women in India"** to your students on **02.03.2022**. It was an honour and privilege to be given the opportunity to share my experience and knowledge with the students of your esteemed college.

The experience of speaking to your students was truly rewarding for me. The level of engagement and interaction from the students was outstanding, and I greatly enjoyed the insightful questions and comments that were raised during the session. The enthusiasm and interest displayed by the students are a testament to the quality of education provided by your college.

I commend your college for its commitment to providing a well-rounded education to its students. The opportunity to speak at your college allowed me to contribute to this mission and promote education, particularly in the field of law. I'm sure the students have benefitted greatly from the discussion, and I hope that the information I shared motivated them to achieve their goals.

Once again, thank you for giving me this opportunity to speak to your students. It was a memorable experience for me, and I'm glad I could contribute to your stellar program. I look forward to collaborating with you and the college in the future.

Sincerely,

Nityananda Pradhan

Background:

The institute has put in consistent endeavors in deftly carrying out social responsibilities which prove beneficial to mankind at large. One such activity is the Blood Donation Camps organized by the institute. The camp serves multiple purposes for students and faculty involved.

1. **The Need for the Camp:** The purpose of education is not just making job ready students, rather it is to inculcate an unflinching sense of social welfare. The students at the institute learn this value by contributing to the social cause.
2. **The Contributors:** The activity is a centrally driven initiative that invites participation from faculty, students, administration and management.
3. **The Planning and Execution:** The delegation of responsibility flows from the apex members to student volunteers. The administration appoints one chief coordinator who builds his or her own team consisting of members of faculty and staff. A grand team of student coordinators and volunteers is also constituted for the field work. The institute has been successful in donating about 62 (approx.) of blood to the blood bank every year.
4. **The Celebration:** The event begins with a grand inaugural ceremony organized by the cultural team. The day begins with a formal inauguration which hosts dignitaries from top-notch medical representatives. Eminent doctors and administrators from the health department participate as the distinguished guests to motivate the gathering.
5. **Skills learnt-** The event has been proved to be a milestone in shaping the personality of the students involved. Every engineer is expected to be trained in soft skills as well as the technical field that he or she belongs to. The students learn the essential tenets of teamwork, leadership, conflict resolution, decision making and many more.

Conclusion: The activity is a perfect example of working together for the social cause. Countless people have been benefitted over these years and the institute feels humbled to have helped them.

Principal
Radhakrishna Institute of Technology
& Engineering, Bhubaneswar

Preamble: The first record of the voluntary blood donation initiative in India is noted in 1942, at the time of World War II and the first blood bank was established in Kolkata, West Bengal. The blood bank was set up at that time to fulfill the blood needs of those injured in the battle field. Government employees and industrial houses volunteered to donate blood for this humanitarian cause. Once the war ended, the enthusiasm waned and blood bank collections were largely from professional or the paid blood donors. A decade passed by till Mrs. Leela Moolgaokar initiated voluntary blood donation drive in Bombay (now Mumbai) from 1954 onwards. She was inspired by the blood need of her injured son. In 1971, Prof. J.G. Jolly the founder President of the Indian Society of Blood Transfusion and Immunohematology took the movement to further heights and the Society under his stewardship declared October 1 as National Voluntary Blood Donation Day which was later accepted by the government too. Since then many blood donor organizations came up in different regions of the country in support of the noble cause of voluntary blood donation. The National Blood Policy (2002) and an Action Plan for Blood Safety (2003) were adopted by the Government of India. The NBTC (National Blood Transfusion Council) was entrusted with planning a national campaign.

There are four main blood types: A, B, AB and O. In 1901, Karl Landsteiner, an Austrian physician, discovers the first three human blood groups. On his birthday June 14th "World Blood Donors Day" is celebrated.

Radhakrishna Institute of Technology and Engineering has always been engaged in the activities of human concern and societal & environmental development. We have been organizing Blood donation camps since long time. Voluntary Blood Donation Camp was organized on **22.06.2022**

Blood Donation Camp on 22.06.2022

RITE has always shown its kind gesture for the service of humanity and environment. Blood donation camps, Tree plantations, Awareness campaigns, Marathons, Spiritual lectures, Human values workshops, Medical Camps, Gramothan related other activities etc are being organized by our institute on regular basis.

On this day 30 units of blood was collected. Some events for awareness and motivation were held before the blood donation. Pre and post refreshments were provided to the students. All the willing blood donors were first of all checked by doctors for their health conditions. Some basic blood tests were also done as prescribed. After donating the blood, the donors were taken care. First time donors, 1st year students who were not 18 years and other students celebrated the blood donation by cutting the cake. There is large no of faculty members who are regular blood donors.

Background:

The institute has put in consistent endeavors in deftly carrying out social responsibilities which prove beneficial to mankind at large. One such activity is the Blood Donation Camps organized by the institute. The camp serves multiple purposes for students and faculty involved.

1. **The Need for the Camp:** The purpose of education is not just making job ready students, rather it is to inculcate an unflinching sense of social welfare. The students at the institute learn this value by contributing to the social cause.
2. **The Contributors:** The activity is a centrally driven initiative that invites participation from faculty, students, administration and management.
3. **The Planning and Execution:** The delegation of responsibility flows from the apex members to student volunteers. The administration appoints one chief coordinator who builds his or her own team consisting of members of faculty and staff. A grand team of student coordinators and volunteers is also constituted for the field work. The institute has been successful in donating about 62 (approx.) of blood to the blood bank every year.
4. **The Celebration:** The event begins with a grand inaugural ceremony organized by the cultural team. The day begins with a formal inauguration which hosts dignitaries from top-notch medical representatives. Eminent doctors and administrators from the health department participate as the distinguished guests to motivate the gathering.
5. **Skills learnt-** The event has been proved to be a milestone in shaping the personality of the students involved. Every engineer is expected to be trained in soft skills as well as the technical field that he or she belongs to. The students learn the essential tenets of teamwork, leadership, conflict resolution, decision making and many more.

Conclusion: The activity is a perfect example of working together for the social cause. Countless people have been benefitted over these years and the institute feels humbled to have helped them.

& Engineering, Bhubaneswar

Preamble: The first record of the voluntary blood donation initiative in India is noted in 1942, at the time of World War II and the first blood bank was established in Kolkata, West Bengal. The blood bank was set up at that time to fulfill the blood needs of those injured in the battle field. Government employees and industrial houses volunteered to donate blood for this humanitarian cause. Once the war ended, the enthusiasm waned and blood bank collections were largely from professional or the paid blood donors. A decade passed by till Mrs. Leela Moolgaokar initiated voluntary blood donation drive in Bombay (now Mumbai) from 1954 onwards. She was inspired by the blood need of her injured son. In 1971, Prof. J.G. Jolly the founder President of the Indian Society of Blood Transfusion and Immunohematology took the movement to further heights and the Society under his stewardship declared October 1 as National Voluntary Blood Donation Day which was later accepted by the government too. Since then many blood donor organizations came up in different regions of the country in support of the noble cause of voluntary blood donation. The National Blood Policy (2002) and an Action Plan for Blood Safety (2003) were adopted by the Government of India. The NBTC (National Blood Transfusion Council) was entrusted with planning a national campaign.

There are four main blood types: A, B, AB and O. In 1901, Karl Landsteiner, an Austrian physician, discovers the first three human blood groups. On his birthday June 14th "World Blood Donors Day" is celebrated.

Radhakrishna Institute of Technology and Engineering has always been engaged in the activities of human concern and societal & environmental development. We have been organizing Blood donation camps since long time. Voluntary Blood Donation Camp was organized on **02.10.2021**

Blood Donation Camp on 02.10.2021

RITE has always shown its kind gesture for the service of humanity and environment. Blood donation camps, Tree plantations, Awareness campaigns, Marathons, Spiritual lectures, Human values workshops, Medical Camps, Gramothan related other activities etc are being organized by our institute on regular basis.

On this day 30 units of blood was collected. Some events for awareness and motivation were held before the blood donation. Pre and post refreshments were provided to the students. All the willing blood donors were first of all checked by doctors for their health conditions. Some basic blood tests were also done as prescribed. After donating the blood, the donors were taken care. First time donors, 1st year students who were not 18 years and other students celebrated the blood donation by cutting the cake. There is large no of faculty members who are regular blood donors.

Description:

The youth club, Young Tarang and IQAC, RITE in association with YI had arranged an awareness campaign on women menstrual hygiene and care on 7th April at 3PM in the seminar hall. Prior to this event, notice had been circulated among staffs and students. It was specially arranged for girls students. The speaker, **Dr.Kajal Rakshit**, the eminent gynecologist discussed the detail process of women menstrual cycle and the importance of hygiene and care at those time one should take.

The students actively interacted with the Speaker. They asked many questions and Dr. Rakshit answered their questions and cleared their doubts. It was very informative and useful for all of us.
